TAMEKA STEVENSON

San Diego, CA (remote) | [LinkedIn](#)

SUMMARY OF QUALIFICATIONS

U.S. Navy veteran pivoting from healthcare to software development, bringing along fine-tuned problem solving skills, attention to detail, and the desire to experience personal and professional growth in a team environment. Dedicated, fast learner who is adept in an array of scripting languages, development tools, and agile project management practices.

SKILLS SUMMARY

- HTML & CSS
- Javascript
- Bootstrap
- Postman

- PostgreSQL
- Ruby / Ruby on Rails
- React / React on Rails
- JSON

- RESTful architecture
- Test-driven development
- Debugging
- Git version control

PROFESSIONAL EXPERIENCE

SCIENTIST.COM — Solana Beach, CA (remote)   **Jun 2022 - Jul 2022**
Full Stack Developer (Intern)

- Improved knowledge and use of Github project management tools, such as milestones, wikis, and automated triggers, during weekly sprint planning.
- Organized supplier list by accessing data in Redux store and using Javascript to manipulate it accordingly.
- Completed user-friendly, responsive styling of ads from an external source using Block-Element-Modifier CSS methods.

LEARN ACADEMY — San Diego, CA (remote)   **Mar 2022 - Jul 2022**
Full Stack Developer (Student)

- Acquired foundational knowledge of understanding programming languages, reading documentation, manipulating databases, and code debugging.
- Achieved proficiency in delivering valuable products via pair-programming and use of scrum methodology.
- Volunteered as a teacher's assistant and mentor to aspiring developers that register for LEARN Academy's Jumpstart and Bootcamp, respectively.

UNITED STATES NAVY — Various Locations   **Sep 2011 - Mar 2021**

Epidemiology Team Lead
- Directed and evaluated a team of 10 contact tracers on investigations into regional SARS-CoV2 outbreaks.
- Developed a PDF fillable intake form to streamline contact tracing, reducing use of manpower from one-hour per patient to 15 minutes per patient.
- Educated over 100 medical staff on established protective measures to prevent the spread of SARS-CoV2 while maintaining adequate patient care.

Certified Pharmacy Technician
- Prepared intravenous solutions, admixtures, respiratory drugs and other solutions using aseptic techniques.
- Consulted with and advised patients and providers on specified use and potential side effects of prescribed medications.
- Troubleshot pharmacy hardware and software (e.g. Pyxis, ScriptPro), minimizing pharmacy downtime.

Senior Medical Department Representative
- Trained 30 uniformed personnel on department policies and procedures to maximize efficiency and accuracy during patient care.
- Administered vaccinations, collected blood specimens, and managed physical and electronic medical records for over 250 service members.
- Provided triage, first-aid and referral to outside medical providers during workplace injury or medical emergency.

EDUCATION
